EXPECTED HOME

HE AND HIS WIFE SEE THE GREAT HAWAIIAN VOLCANO.

Make a Night Trip to the Edge of the Crater and View the Molten Lava.

The following letter from Dr. Edvard Rich is descriptive of the Kilauea volcano, which the doctor and his wife were visiting at the time of writing. According to the letter, the doctor may reach home within the next few days:

"Volcano House, Hawaii, Jan. 21,

"Editor Standard: Since writing you last we have been around the island of Oahu. We visited the Mormon settlement at Laie and were most kindly received by the elders and Hawaiians alike. On this plantation the church has about six hundred acres of cane and everything looks thirtfy and prosperous. Some of the Hawaiians have very good houses, well fur nished, and we were fortunate enough to be invited to a feast at one of these

"The Hawaiians are kind-hearted and very hospitable, good-natured and take things as they come-do not worry about tomorrow. We saw them fishing. The whole village turned out to help draw in the net. One boat sank and they were not very successful. When the fish are brought ashore every one helps himself-all are welcome. And if any fish remain, the owner of the nets dispose of them.

"The scenery in places is very fine The Poli is one of the prettiest and as a result from which tuberculosis grandest viewpoints of mountain, sea and sky in the territory.

"But before I go further, I must tell you something of the volcano Kilauea. for it is interesting us most just now The trip from Honolulu is 260 miles services will be held at the Clinton by water and 23 miles by rail and 9 miles by stage—quite a trip in itself. We had a nice voyage, but were so very tired when we reached the volcano house that we had made up our minds to retire early and rest, but when we drove up and saw the glare of the volcano lighting up the sky in the distance we all said we must see it tonight. So after a good dinner, we procured horses, guides and lanterns, and off we went down the steep, winding, rocky trail into the old crater. It was a very pretty sight. The night was dark and every one carried a lantern and these and the shouts of the crowd on the trail were very enchanting. After reaching the old crater, we traveled over lava beds for over two miles. We saw huge cracks by the side of the trail and saw steam escaping from various places. We began to hear the noise in the distance and the sulphur fume grew stronger. We left our horses in grew stronger. We left our horses in a corral made of lava rock and soon found our way over hot cracks in the lava to the edge of the active crater. lava to the edge of the active crater, Holemawman-probably the largest active volcano in the world. It is a large, boiling cauldron, about 600 feet long by 400 feet wide. The red hot lava is about two hundred feet below the surface. The noise is like a heavy surf beating on the rocks. This great mass is in constant activity-boiling spurting and dashing against the sides like a heavy sea. The sulphur fumes are quite strong and the heat is considerable but one can sit and watch it for a long time on the very edge of the crater. It is very interesting

> on of nature. "We remained an hour or more on the edge of the crater. It was nearly midnight, so the crowd began to start back. I remained until the last one and could have remained much longer. We were all very tired when we again reached the hotel, but felt fully re

"This morning we could see steam escaping from many places around the hotel and some of these places are very hot.

paid for our trip.

'This afternoon we took our lunch and went slowly down the trail in the daylight, viewed the vest lava beds. inspected the hot fissures and burnt postal cards in them, and viewed the volcano by daylight. We remained until after dark to see it again at its best. Our coffee was boiled over a hot crack in the lava.

"We waited until it was dark and watched the everlasting fire for awhile and then slowly found our way back to the hotel.

"We leave tomorrow morning for Hilo and sail for Honolulu about noon and expect to sail for San Francisco, January 30th, so you will probably see us home soon after getting this let-

New York, Feb. 5.-Tom O'Rourke, one of the best judges of pigilistic at-fairs, who predicted the victory of Jack Johnson over Tommy Burns, now goes on record as saying that Sam Langford will defeat Jonnson when they meet in London on May 24 "I saw Langford and Johnson box

two years ago in Boston," says O Rourke. "On that occasion, Langford, who weighed only 138 pounds, had Johnson down for the count in the second round. The referee took his time in counting the seconds, so that Johnson was able to recover by the time he got up. After that Johnson took no chances and won on points at the end of fifteen rounds. Langford can do 158 now and he is a far better pugilist than ever before. He is very much like Joe Walcott in build and style, is a terrific hitter and is also clever. He can give Johnson about 10 pounds in weight and four inches in height and still win, for the reason that he can hit harder than the new neavyweight champion and can take all the punishment that the letter can hand to him.

"I think that Sam Fitzpatrick made a mistake in accepting a \$6,000 purse for the Johnson-Langford mill, because he could get \$25,000 here and would also be able to put the fight off until next fall. Johnson, in the meantime, could tour Great Britain at \$1,500 a week, which would be real easy money

WIDOW OF PRESIDENT'S FRIEND TELLS STORY.

ler Husband Saved Martyr From Ter-rible Death at Baltimore When On His Way to Be Inaugurated.

Springfield, O., Feb. 8.-That an attempt was made upon President Lin-coln's life in Baltimore as he was on his way to Washington to take office, is told by Mrs. Coggeshall, widow of the Springfield man who saved the president from death. All these years the story has remain-

ed a secret with Mrs. Coggeshall, to whom it was told by her husband in secrecy. It comes to light now merely because Mrs. Coggeshall believes its telling can do no harm and that it may be an interesting addition to the Lincoln literature of the month.

Her story is that a bomb was hurled into the coach occupied by Lincoln

as it was standing in the station in Baltimore, and that her husband first shoved Lincoln through the door of the car and then hurled the homb through a window of the coach away from the crowd. Coggeshall, who was one of Lincoln's

close friends, accompanied him from Columbus, O., to Washington. He was later sent by Lincoln as minister to Ecuador where he died of yellow fever. Mrs. Coggeshall says:
"A change of cars had to be made

in Baltimore. The special car dashed into the depot and preparations for an immediate change for the Washan immediate change for the Washington car were made. Mr. Lincoln and my hasband were the last to leave the coach. Mr. Lincoln, who was leading, turned just as they reached the door and saw a hissing bomb in the seat he was passing. Mr. Coggeshall turned and saw what menaced them.

"He gave Lincoln a show that sent him out on the platform, grabbed the bomb and hurled it out of the window opposite to where the crowd was gathered and then hursed to the waiting train. When they had become composed, Lincoln exclaimed: "Coggeshall, did I not tell you that if you came with me I should come safely? God knows best."

"For a moment my husband could not talk. Then he said: "Mr. President, let this pass no further. Let us not give it to the world to be criticised."

"Who put the bomb in the car was

Reno, Nev., Feb. 7.—An unusual amount of heavy wet snow has been falling for the past 24 hours. The streets are covered to a depth of six inches while many feet fell in the hills. The Truckee river is slowly rising.

A new stone has been discovered, that, according to the belief of Secretary Garfield, can be utilized for building purposes, and for that reason experiments are about being started by the interior department in the San Carlos Indian reservation, in Arizona, with a peculiar earth formation found there, called "tufa" or "white ash." When first removed from the quarry it can be cut with an ordinary knife, butt hardens when it is exposed to the atmosphere. Arnold Jackson, who owns some atmosphere.
